Can you have a quick look at the section on phthalates?

Now that I have read this through, ONLY TSCA is mentioned as a program for this effort.

I had a few editorial suggestions (attached).

Mark – does the TSCA piece comport with what you heard from the phthalate team?

OPP – do you want to ‘pass’ on this given not OPP equities?? It does occur to me that OPP is the only office I know of in EPA that has actually done cumulative chemical risk assessments, and this is not mentioned...

There was a meeting about this last week that I could not attend; seems to be moving rapidly; I think Maureen referenced below is Maureen Gwinn from ORD – who btw have “cumulative impacts” as one of their cross-cutting focus areas for the current round of research planning, so hopefully this is highly consistent with what they are planning. I notices on the transmittal there is NO pesticide reps, so wanted to get this to you asap for OPP and OCSPP review. If you send me any comments you have I will incorporate with mine (for OPPT) ...it is due by 1 pm TODAY

Good morning all. Sorry for the delay in getting this to you. Given this proposal's level of complexity, not to mention that it came out of nowhere, I requested an extension from the Office of Budget. However, that request was denied. So at this point, we only have time for a red flag review (i.e. things you really can't live with). **Please provide comments by 1:00 PM today, August 18.** Thanks for all your efforts. And thanks to Maureen and Susan who did a really nice job pulling this together in a very short timeframe.

Dan
